- 10) Do you ever ask yourself questions like: Why do I need to study ancient Egypt? I don't ever plan to build a pyramid. And why should I study the life cycle of a butterfly? How will that ever make a difference in my life? Now think about this Japanese wisdom:

***You can't see the whole sky through a bamboo tube.***

In other words, without an education, we can see only a small part of the world around us. Education gives us a panoramic view. Education broadens our way of looking at the world so that we become bigger, better, and wiser human beings.

Today, with everything you learn, think about how it gives you a bigger picture of life.

Today will be a great day if you make it one. Have a great day Cubs!!!
